I live in a small town which has very little choice in its AM/FM radio content. I also travel through the mountains of Colorado where you get very few radio signals and the ones you do get are not clear, strong signals. It was really an easy choice to subscribe to XM Satellite Radio when I first heard about it.

I get the variety that I enjoy whether I am in the mood to listen to a story, a talk show, or music. I may be in the mood to listen to the music of the 70's or movie music or classical music. I can choose what I want when I want. If I am traveling to Denver I can listen to the traffic and weather there to help me decide my travel plans.

I choose to spend my hard earned money on XM Satellite Radio and it should not be up to the National Association of Broadcasters to dictate what I am allowed to hear.

I urge you to reject the NAB's petition 04-160 and support XM's ability and commitment to provide the kind of programming that I am spending my money on to listen to.
